Projects

Smart Milk Adulteration System
Python, Flask, SQL, HTML, CSS
Developed a real-time milk quality monitoring system using IoT sensors to measure pH, conductivity, and temperature. The system processes sensor data through Flask to detect possible adulteration and displays results with alerts on a web dashboard.

AI-Based Plant Disease Detection & Monitoring
Python, HTML, CSS, JavaScript
Developed an AI-based system that analyzes leaf images to identify common plant diseases. The machine-learning model predicts the disease and provides basic information through a simple web interface
